

PROPOSAL FOR

Zach's Surf Shop

Pro Basketball Postseason broadcasts in Los Angeles DMA

FLIGHT WINDOW

4/18 - 6/21/2026

LIVE CONTENT

Pro Basketball Postseason · Live in-game telecast inventory

OVERVIEW

Executive Summary

This proposal structures the buy as a 50/50 match between Live and Support inventory. Total package investment is \$4,000, allocated as \$2,000 to Live in-game inventory and \$2,000 to a single Support line. The three Support options below differ in CPM and resulting impression delivery; one must be selected to complete the package.

FLIGHT

■ PACKAGE DETAIL • AUDIENCE

Audience

Extend your Live campaign with impressions delivered against indexed audience segments — viewers selected by demographic, behavioral, or category-propensity attributes. Inventory mix is optimized to over-deliver against the chosen audience definition. Our team will recommend the right segment build for your campaign goals.

WHAT'S INCLUDED

- Indexed audience targeting: demo, behavior, and category-propensity segments.
- 1P and 3P data segments available; 3P data fees may apply.
- Frequency capping and creative rotation managed at the audience level.
- Reporting: impressions, on-target %, reach, frequency, eCPM.

AT A GLANCE

Audience

Index-based audience targeting against demo, behavior, and category-propensity segments delivered across measured CTV inventory.

RATES & DELIVERY

See package comparison →

■ PACKAGE DETAIL • CUSTOM NETS

Custom Networks

Support package · delivers across premium sports networks, keeping all your campaign impressions as content-adjacent as possible.

WHAT'S INCLUDED

- Curated network bundle: live sports + sports-adjacent programming.
- Cross-network frequency management to control duplication.
- Brand-safe, content-adjacent context aligned to the live sports environment.
- Reporting: impressions, network mix, reach, frequency.

AT A GLANCE

Custom Networks

Curated bundle of premium sports and sports-adjacent networks delivering cross-network reach alongside the live in-game telecast.

RATES & DELIVERY

■ PACKAGE DETAIL • ADDRESSABLE TARGETING

Addressable Targeting

Support package · Household-level (1:1) delivery to specific addressable households on connected TV. Bring your own match file, use a third-party data segment, or layer audience overlays to define the target HH set. Frequency is managed at the household.

WHAT'S INCLUDED

- HH-level (1:1) addressable delivery on premium CTV inventory.
- Bring-your-own match file (1P) or 3P data segment to define the target HH set.
- Frequency capping and creative rotation managed at the household.
- Reporting: impressions, unique HHs, reach, frequency, eCPM.

AT A GLANCE

Addressable Targeting

Household-level (1:1) addressable inventory on connected TV. 1P match files and 3P data segments supported.

■ COMPARISON

Package Comparison

Each option includes the locked Live component — 26,667 in-game impressions for \$2,000 at \$75 CPM during Pro Basketball Postseason broadcasts — paired with \$2,000 of support inventory. The three options differ in the support CPM, which drives the support impression count and the resulting blended eCPM for the full package.

	Option A • Addressable	Option B • Custom Nets	Option C • Audience
Support Rate	\$45 CPM	\$40 CPM	\$35 CPM
Support Imps	44,444	50,000	57,143
Package Total Imps	71,111	76,667	83,810
Blended eCPM	\$56.25	\$52.17	\$47.73
Total Investment	\$4,000	\$4,000	\$4,000

■ REFERENCE

Methodology

Definitions and assumptions backing the figures in this proposal.

- **CPM** Cost per thousand impressions. Live CPMs reflect in-game premium placements during Pro Basketball Postseason broadcasts; support CPMs refer to secondary impressions for each individual targeting parameter (Addressable, Audience, Custom Networks: each has a distinct CPM).
- **eCPM (Effective CPM)** $\text{Total package investment} \div \text{total package impressions} \times 1,000$. The blended rate across Live and Support delivery, used to compare option-level efficiency.
- **Live In-Telecast** Inventory delivered during the live game window — premium placements with the highest attention and recall.
- **Support Package** This refers to the support option that will run alongside the live in-game sports impressions. Three flavors: Addressable (HH-level), Custom Nets (curated bundle), Audience (index-targeted).
- **DMA** Designated Market Area — Nielsen-defined geographic boundary used for inventory caps and targeting.

■ DELIVERY

Terms & Notes

Conditions for the buy described in this proposal.

- Live in-telecast inventory delivered against premium sports broadcasts on connected TV.
- Impressions guaranteed against measured CTV households in the selected DMAs.
- Buyer to confirm creative specs (15s/30s) and trafficking instructions 7 business days prior to flight.
- Live CPM reflects in-game premium placements; package CPMs reflect blended delivery.
- Reporting cadence: impressions, reach, frequency, eCPM at flight midpoint and completion.
- Makegoods at like-quality inventory; cancellation per IAB standard terms unless otherwise agreed.
- All figures shown are illustrative — this is a sanitized portfolio demonstration.
